🔗 Muhammad-Wasif-Qamar

PROFILE

Computer Science undergraduate specializing in Artificial Intelligence, Natural Language Processing, and data-driven systems.

Currently developing systems for entity and relation extraction from cyber threat reports using machine learning and NLP techniques. Passionate about building real-world AI solutions.

PROJECTS

NER & Relation Extraction System

(In Progress)

- Designed an AI pipeline using Python for entity extraction from unstructured CTI reports
- Applied text preprocessing and NLP techniques for structured data generation
- Developing relation extraction logic for knowledge graph construction

AI Data Processing Pipeline

- Built a modular pipeline for preprocessing and analyzing text datasets
- Implemented data cleaning and feature extraction techniques
- Designed system to support machine learning and NLP workflows

SKILLS

Python

Machine Learning

Natural Language Processing

Data Analysis

Git

PROFESSIONAL EXPERIENCE

AI Contributor

Developer Hub

- Completed tasks involving AI-based data processing and pipeline development
- Worked with Python to implement basic NLP and data handling workflows
- Participated in structured technical exercises focused on practical AI applications

EDUCATION

Riphah International University

Bachelor of Computer Science

2022 – Present

Islamabad, Pakistan

LANGUAGES

English

Urdu

CERTIFICATES

- Python: A Guided Journey from Introduction to Application
- CCNA: Switching, Routing, and Wireless Essentials
